

WHAT IS CLAIMED IS:

- A
1. An aqueous composition for oral use comprising:
 - a) an anti-odor and anti-plaque active component selected from the group consisting of an extract of *Glycyrrhiza glabra*, an extract of *Usnea spp.*, an anti-odor and anti-plaque component of said extracts, and mixtures thereof;
 - b) a surfactant selected from the group consisting of cationic surfactants and nonionic surfactants and mixtures thereof.
 2. An aqueous composition according to claim 1 having a pH less than about 5.
 3. A composition according to claim 1 wherein said anti-odor and anti-plaque active component of an extract of *Glycyrrhiza glabra* is selected from a group consisting of glabrinins, licochaleones, glycyrrhizic acid, glycyrrhetic acid and other flavonoids and coumarins.
 4. A composition according to claim 1 wherein said anti-odor and anti-plaque active component of an extract of *Glycyrrhiza glabra* is selected from the group consisting of water-insoluble extracts of *Glycyrrhiza glabra*.
 5. A composition according to claim 1 wherein said anti-odor and anti-plaque active component of the extract of *Usnea florida* comprises usnic acid.
 6. A composition according to claim 1 wherein said cationic surfactant comprises a pyridinium compound.
 7. A composition according to claim 6 wherein said pyridinium compound comprises cetyl pyridinium chloride.
 8. A composition according to claim 1 wherein said non-ionic surfactant comprises a poloxamer.
 9. A composition according to claim 1 further comprising an oligosaccharide.
- B

- 100535001-110201
10. A composition according to claim 1 or 9 further comprising a divalent metal cation.
 11. A composition according to claim 10 wherein said divalent metal cation is selected from the group consisting of copper, zinc, selenium, calcium and magnesium.
 12. A composition according to claim 9 wherein said oligosaccharide is selected of the group consisting of fructo oligosaccharides, soy oligosaccharides and inulin.
 13. A nonaqueous composition for oral use comprising:
 - a) an anti-odor anti-plaque active component selected from the group consisting of an extract of *Glycyrrhiza glabra*, an extract of *Usnea spp.*, an anti-odor and anti-plaque component of said extract, and mixtures thereof;
 - b) a non-aqueous solubilizing agent.
 14. A composition according to claim 13 further comprising a cationic surfactant.
 15. A composition according to claim 13, further comprising a nonionic surfactant.
 16. A composition according to claim 14 or 15 further comprising an oligosaccharide.
 17. A composition according to claim 14 or 15 further comprising a divalent metal cation.
 18. A composition according to claim 16 further comprising a divalent metal cation.
 19. A composition according to claim 13, 14 or 15 further comprising a waxy carrier.
 20. A composition according to claim 16 further comprising a waxy carrier.
 21. A composition according to claim 17 further comprising a waxy carrier.
 22. A composition according to claim 18 further comprising a waxy carrier.

- X
23. A composition according to claim 13 in the form of a gel.
24. A composition according to claim 13 in the form of a butter.
25. A composition according to claim 13 in liquid form.
26. A buccoadhesive composition for oral use comprising:
a) an anti-odor and anti-plaque active component selected from the group consisting of an extract of *Glycyrrhiza glabra*, an extract of *Usnea spp.*, an anti-odor and anti-plaque component of said extracts, and mixtures thereof;
b) a bioadhesive gum, polymer, or polysaccharide.
27. A composition according to claim 26 further comprising a cationic surfactant.
28. A composition according to claim 26 further comprising an oligosaccharide.
29. A composition according to claim 26 further comprising a divalent metal cation.
30. A composition according to claim 28 further comprising a divalent metal cation.
31. A chewable composition for oral use, comprising:
a) an anti-odor and anti-plaque active component selected from the group consisting of an extract of *Glycyrrhiza glabra*, an extract of *Usnea spp.*, an anti-odor and anti-plaque component of said extracts, and mixtures thereof;
b) a chewable polymer, rawhide, casein, protein or carbohydrate matrix.
32. A composition according to claim 31 further comprising a cationic surfactant.
33. A composition according to claim 31 further comprising an oligosaccharide.
34. A composition according to claim 31 further comprising a divalent metal cation.

35. A composition according to claim 33 further comprising a divalent metal cation.
36. A method for reducing plaque formation on tooth enamel, dentine, and soft tissue in the oral cavity comprising the step of contacting said enamel, dentine and tissue with an anti-plaque reducing effective amount of a composition according to claim 1, 13, 26 or 31.
